

## **Map of consultation workshop**

Malcolm Thomas and Keith Birrell introduce the Lands End to John O'Groats map of the consultation that helps you to keep organised and orientated in your consultations. In this workshop we focus on our learners needs. Learners needs that are common priorities amongst all GPs. We teach you essential communication skills. You will learn about signposting, how to let your patient tell their story in a concise way, how to explore relevant psychosocial and occupational details and how to structure giving results. We also discuss checking understanding and keeping to time in the consultation.
